

13 Top Doctors Predict The Next Big Thing in Beauty

By Danielle Fontana , Editorial Assistant | July 27, 2016

Innovations in the medical field are always exciting, but we're always itching for more. Here, some of the top leaders in the industry share what they believe—and hope—is next in beauty.

8/13

Dr. Elie Levine, plastic surgeon

"Being more open about plastic surgery overall will be the next trend; surgery no longer being taboo. Aside from that, facial implants/Autologous fat grafting will pick up steam, especially to the buttocks."
